SUMMARY

Graduated in video game development, I started my IT journey at Grupo Visabeira in 2017. After deepening my knowledge in search of missing foundations in a professional retraining program, I went through Critical Software in 2019, and I am currently employed at Huf Portuguesa, developing business intelligence for the entire group. At the moment I aim to finish my master's degree in Informatics Engineering, and I'm looking for challenges and discomforts that make me grow as a person and as a professional. I invite you to visit my LinkedIn profile to learn more about my path, certifications and training.
